

CA\$H 9k

PRODUCT SUMMARY

Short and sweet — the new CA\$H 9k is a quieter, lighter, and more durable suppressor. Manufactured almost entirely of titanium and 17-4 stainless steel, the CA\$H 9k is perfect for submachine, PCC, lever action, and fixed-barrel systems. With our next generation Flow-Baffle® technology, this suppressor significantly reduces gas blowback while maintaining superior pistol performance. The CA\$H 9k was designed to offer a compact, cleaner, and more efficient solution for today's shooters needs. The Flow-Baffle design is based on our patented and proven Flow-Through® technology providing an improved experience from shooting to maintenance. Added wrench flats at the base and cap make for a quicker disassembly and available adapters allow for greater modularity and system compatibility.

DEVELOPMENT LEVEL:	Fully developed — in production
WEIGHT:	5.9 oz / 167 g
OVERALL LENGTH:	5.15 in / 13.08 cm
DIAMETER:	1.375 in / 3.49 cm
CALIBER:	9mm, 300 BO Sub-sonic, 350 Legend
DURABILITY:	Full-auto rated
MOUNT OPTIONS:	Ships with 1/2-28 direct thread adapter; Booster assembly and 3-lug available in various thread patterns.
