

# RAD 9

## PRODUCT SUMMARY

Built with our next generation Flow-Baffle® technology, the RAD 9 substantially reduces gas blowback while maintaining superior performance. The Flow-Baffle design is based on our patented and proven Flow-Through® technology providing an improved experience from shooting to maintenance. Adjustable in a long- or short-configuration, this lightweight suppressor can be optimized to operate on a variety of weapon systems. Wrench flats at the base and cap make for a quicker disassembly and available adapters allow for greater modularity and system compatibility.

<b>DEVELOPMENT LEVEL:</b>	Fully developed — in production
<b>WEIGHT:</b>	Long Configuration - 9.1 oz / 258 g Short Configuration - 5.9 oz / 167 g
<b>OVERALL LENGTH:</b>	Long Configuration - 7.7 in / 19.56 cm Short Configuration - 5.15 in / 13.08 cm
<b>DIAMETER:</b>	1.375 in / 3.49 cm
<b>CALIBER:</b>	9mm, 300 BO Subsonic, 350 Legend
<b>DURABILITY:</b>	Full-auto rated
<b>MOUNT OPTIONS:</b>	Ships with 1/2-28 booster assembly Direct thread and 3-lug adapters available.
