5. Packet of Part B: Heavy Metal Removal Formula
6. Mix & Extraction Wire Tool

Refill Kits contain three (3) packets of Part A: Carbon Removal Formula, three (3) bottles of Part A: Activator, and three (3) packets of Part B: Heavy Metal Removal Formula.

SKU #3203

**THE PROFESSIONAL'S  
CHOICE FOR  
SUPPRESSOR  
MAINTENANCE**

Suppressor Sauce™ represents a significant advancement in suppressor maintenance. This effective two-part, single-use powder-based cleaning system offers a safe and efficient method for removing carbon fouling and heavy metal deposits from suppressors without disassembly, elaborate processes, or exposure to harmful chemicals.

### Unparalleled Safety and Compatibility

- Odorless, Ammonia-Free, and Non-Flammable: Suppressor Sauce™ eliminates safety concerns typically associated with traditional cleaning solvents.
- Suitable for Diverse Materials: The formulation is designed to be safe and effective on titanium, Inconel, stainless steel, and aluminum suppressors.

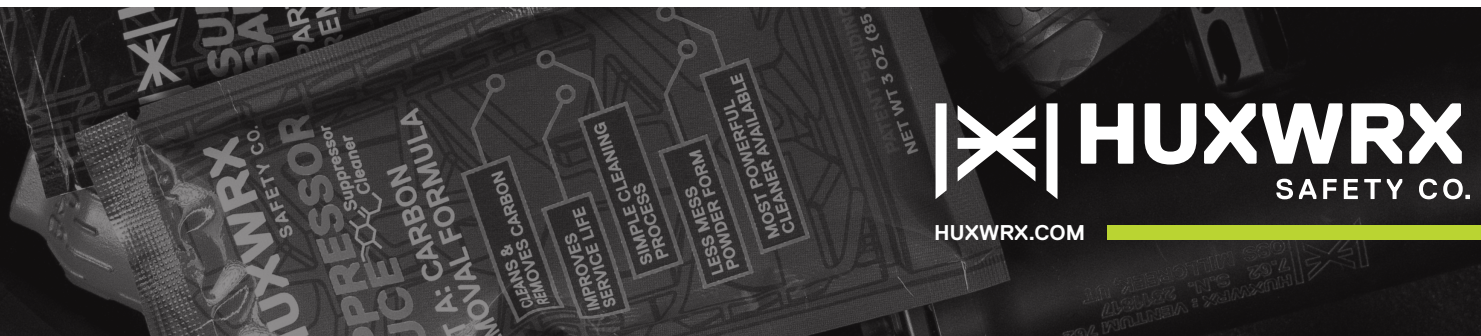

### Targeted Cleaning Performance

- Part A: Carbon Removal Formula and Activator: This component effectively dissolves and removes carbon buildup, a common byproduct of suppressor use.
- Part B: Heavy Metal Removal Formula: This formula specifically targets and removes copper and lead deposits, ensuring a thorough and complete cleaning process.

### Simplified Cleaning Process

- Single-Use Pouches: Pre-measured, single-use pouches ensure consistent cleaning performance and eliminate the risk of over-concentration or improper mixing.
- Disassembly Not Required: Suppressor Sauce™ works effectively without disassembly, minimizing cleaning time and effort.

Suppressor Sauce™ offers a safe, efficient, and user-friendly solution for maintaining the optimal performance of your suppressor.
